

About Us

TruCare is a local clinic with a full line of products intended to facilitate the healing process. With over 70 years of combined experience in the biologic industry, our team of professionals stand ready to support the medical community to help enhance lives and protect patient safety.

We understand how important it is to provide our partners with accountability, dependable service and quality allograft. Our goal is to provide safe clinically effective allograft, while remaining cognizant of the rising cost of healthcare and never forgetting the altruistic gift of donation.

Truly the most important investment we can make, with the greatest return, is in health and duration of our lives, so that we may fully enjoy our family, friends and fruits of our labor. Until now, those most important assets of health and time have been elusive at any price. Introducing a unique, revolutionary, and comprehensive regenerative medical program to enhance healthy lives and lifespan."

***Life without pain...
It is possible***

Great News For Chronic Pain Sufferers

Now there is an innovative medical treatment called AlloGen – LI. Containing all natural components, AlloGen focuses on your body's ability to heal and regenerate itself. Instead of simply managing pain, AlloGen – LI may contribute to minimizing or eliminating it all together.

Who Can Enjoy The Benefits?

Men and Women, young and old, who suffer from chronic joint pain, may be good candidates for AlloGen – LI, as well as those who struggle with orthopedic conditions including, but not limited to chronic arthritis, chronic tendonopathy, tendonitis and chronic fasciitis. Our patients range from the weekend warrior to the world class athlete.

How It Works.

AlloGen – LI is completely natural with components that work to kick start your body's own rejuvenation and healing process. AlloGen – LI is a liquid aminion allograft composed of amniotic fluid which has been well studied and used safely over 100 years. Some people may hesitate at the idea of amniotic fluid. Be assured that the amnion liquid is obtained during cesarean sections from carefully screened consenting donors.

The Inside Story Aminion Liquid Components

Cytokines:

Protein messengers that regulate inflammation.

Growth Factors:

Contribute to cell proliferation and migration.

Collagens 111, IV, V, and VII:

A family of proteins that strengthen and support soft tissue and connective tissue throughout the body.

If you have frequent pain and swelling in a joint or tendon, you may be familiar with corticosteroids. As a steroid hormone, corticosteroid injections mask the pain by shutting down the body's nerves in a specific area. Relief begins right away, but it doesn't last. Thus the next one. And the next one.

AlloGen – LI, on the other hand, is typically a one-time treatment that can initiate your body's own rejuvenation and healing process. The natural anti-inflammatory components begin working over a short period of time and then the cells do the work of repairing the body...the faster you heal the better you will feel.

Testimonials

"Playing the NFL, I was used to everyday aches and pains. However, when the pain in my elbow became too intense to ignore I choose to undergo aminion therapy, After one treatment the pain was gone and I feel great!" ...
Jeff, NFL Player, Age 24

"Suffering with shoulder pain for many years, I finally decided to schedule surgery. Fortunately prior to having the surgery done, a colleague recommended I try AlloGen – LI. After the first week I was skeptical as to the efficacy but by week three I had significant improvement and decided to cancel my surgery. Months later, I still feel great!" ...
Mick, Orthopedic Surgeon, Age 62

"As a retired contractor, my body has taken a beating, especially in my ankle. After an ongoing treatment program that included AlloGen – LI, my ankle is virtually pain free and I am back on the golf course enjoying my retirement" ...
Tom Retired Contractor, Age 66
